Roller skates Catalog

WINTERSWEET

WINTERSWEET

In California, Wintersweet embodies a celebration of individuality and the freedom of expression. As a thriving American label, our dedication lies in offering top-tier roller skates and accessories for fashion-forward and conscious individuals of all ages.

OUR VISION

Our journey began with a vision to create a platform for self-expression through the art of roller skating. Collaborating closely with skaters, artists, and enthusiasts, we craft and test each product with meticulous attention to detail to cater to the soulful desires of those seeking a means to express themselves on the go.

OUR SPIRIT

Our ethos is rooted in the essence of celebrating the freedom to be who you are and express yourself without inhibition. Each pair of skates is a testament to our commitment to quality and authenticity, carefully designed and tested by a diverse community of individuals who share a common love for the art of roller skating.

What Make Us Unique?

TRENDSETTING DESIGN

Stand out in the crowd as the embodiment of enthusiasm, infused with elements that resonate with vibrant emotions, our products exude passionate and lively energy.

DYNAMIC MATERIALS

Our commitment to sustainability and adaptability is evident in the rich and ever-changing materials we employ.

LATEST TECHNIQUES

We meticulously incorporate the latest techniques into our product design and production processes, which guaranteeing a level of quality and performance that sets us apart.

Heat Tech Forming

A REVOLUTIONARY TECH

Heat Tech Forming is not just a process,
it's a journey that transforms quad skates into
a personalized expression of your individuality.

TEMPERATI
DIABETICO

All-around Thermoplasticity Beyond Tradition

Unlike traditional techniques that focus solely on heating the shell, Heat Tech Forming allows for an all-around thermoplastic transformation for the upper, enabling the entire boot to be molded by the natural contours of your feet.

Repetitive Moldability for Extended Lifespan

Unlike traditional techniques that focus solely on heating the shell, Heat Tech Forming allows for an all-around thermoplastic transformation for the upper, enabling the entire boot to be molded by the natural contours of your feet.

User-Friendly Operation

We believe that innovation should be accessible to all. The Heat Tech Forming process is designed with simplicity in mind. A quick dip in 80-degree hot water is all it takes to activate the transformative power of Transtic.

Craftsmanship

02. Cutting Material

We meticulously select high-quality materials for each component of the skate. The boots are crafted from premium leather or synthetic fabrics, ensuring both comfort and durability. At Wintersweet, we are dedicated to creating original designs and patterns that set new trends in both style and performance. Each piece of fabric is cut with precision using advanced cutting tools, shaping the materials according to our design specifications. This step guarantees that every part—from the boot panels to the sole and frame fits together seamlessly.

01. Design and planning

Every roller skate begins with a thoughtful design process. Our team of designers crafts detailed blueprints that prioritize ergonomics, style, and performance. This includes elements like boot shape, frame structure, and wheel alignment, all engineered for maximum comfort and durability. Here, you can see how the blueprints guide the cutting of the boot shape from the fabric.

03. Stitching & Assembly

The boot assembly features expertly crafted stitching that unites the various fabric layers, including the exterior, interior padding, and protective reinforcements. This precision stitching ensures durability and strength, resulting in a flawless finish for every skate.

04. Punching holes and placing eyelids

After the upper part of the boot has been stitched together, we carefully mark the positions for the lace holes and eyelids. These holes are then punched and fitted, with their number and spacing tailored to the skate design and the level of support required.

05. Bonding

High-strength adhesive techniques are skillfully utilized to securely bond each component of the skate. This process guarantees optimal comfort, support, and lasting durability.

06. Adding Adhesive

Once the boot is complete, we prepare both surfaces of the sole and apply our high-strength adhesive. The sole is then precisely positioned and firmly pressed into place, eliminating any air bubbles for a seamless fit. After securing the sole, we cure the adhesive under specialized conditions to create a strong and enduring bond.

07. Baking under a red light

After the adhesive is applied, the skates are baked under a red light. This curing process strengthens the bond, enhancing the overall durability of the final product.

08. Reinforcing

Lasting involves shaping the boot by placing the upper part over a "last" (a foot-shaped mold). This process stretches the leather to form the final shape of the boot, ensuring it fits snugly around the foot. The upper material is pulled tightly around the last, smoothing out any wrinkles and setting the structure of the skate. After the boot and sole are attached, the next step is reinforcing the bond between the upper leather (and inner lining) and the sole.

10. Final Product and Shipping

Once the skate is complete, we conduct a thorough quality check. Each component is assessed for durability, alignment, and overall performance, ensuring that every pair upholds our commitment to quality and comfort. After inspections, the skates are packaged with care to ensure they arrive safely. They're then shipped out, ready for customers to enjoy on the rink or the streets.

09. Mounting

The boot is carefully attached to the skate frame. This part is critical as it determines the skate's balance and stability. The frame is mounted securely to ensure smooth rolling and proper weight distribution. Once the frame is attached, the wheels and bearings are installed. The bearings are inserted into the wheels, and then each wheel is secured to the frame. We use high-precision bearings for a smoother glide and better speed control.

Lifestyle

!

A woman with long brown hair, bangs, and multiple tattoos is sitting on a white plastic chair. She is wearing orange-tinted sunglasses and a dark top. Her legs are extended, showing she is wearing light blue roller skates with black laces and four blue wheels. She is sitting on a cobblestone surface. In the background, there is a white wall with a large black letter 'A' and a small table with a white chair. A bottle of water and a cup are on the table.

Skate Parts

Wheels

Glitter Wheels

Features:

- Self-illuminating wheels powered by magnetic induction, no batteries required
- The glitter capability enhances visibility and safety in low-light conditions
- Transparent design with embedded glitter for unique daytime aesthetics
- Durable construction suitable for various skating styles
- Available in three vibrant color options for personalized style

Specification:

- Recommended Use: Indoor/ Outdoor
- Size: 58*32mm
- Hardness: 82A
- Material: PU

Article number:0000000000

Wheels

Roller Wheels

Features:

- Durable construction suitable for various skating styles
- Sleek, all-black design that effortlessly matches any outfit and boot
- Superior shock absorption that turns rough streets into your smooth skating zone

Specification:

- Recommended Use: Indoor/ Outdoor
- Size: 58*32mm
- Hardness: 82A
- Material: PU

Article number:0000000000

Plates

Plates

Features:

- CNC aluminum construction for enhanced impact resistance
- Multiple size options to fit a range of boot sizes
- Ultra-lightweight build (442g-453g) for reduced skater fatigue
- Precision-engineered for optimal power transfer
- Sleek, modern aesthetic to complement your skate setup
- Compatible with standard quad skate wheels and bearings
- Ideal for various skating styles

Specification:

- Size: 114/127/140/152/165/178/191/203mm
- Weight: 442g-453g
- Material: CNC aluminum
- Toe stops: exclude
- Packing: 1 plate, 2 trucks

Article number:000000000

Bearings

ABEC7 Bearings

Article number:000000000

Features:

- Dust-resistant design to maintain performance
- High-precision material ensures smoother rotation for a more fluid skating experience
- Designed for longevity with proper maintenance
- Compatible with standard roller skate wheels

Specification:

- Size: 608Z
- Inner diameter: 8 mm
- Outer diameter: 22 mm
- Width: 7 mm
- Material: High-quality Steel
- Packing: 16 PCS/ tube

Toe Stops

Toe Stops

Features:

- Adjustable for customized skater preference
- Made from premium 85A durometer rubber for ideal performance
- Multiple color options for personalized skate customization

Specification:

- Material: 85A + Rubber
- Size: 5.6*4.5cm
- Stem length: 26.5MM
- Packing: 2 toe stops and 2 nuts

Article number:000000000

Toe Caps & Guards

Toe CAPS

Features:

- Available in TPU, Suede, and MICROFIBER materials to suit different skating styles
- 1.4mm thickness for optimal protection without bulk
- Five color options for personalized customization
- Easy to install and remove for cleaning or replacement
- Compatible with most roller skate models

Article number:000000000

Specification:

- Thickness: 1.4 mm
- Material: TPU/ Suede/ Microfiber

Toe Guards

Article number:000000000

Features:

- Available in 14 attractive colors for extensive customization options
- Simple installation process requiring no special tools
- Compatible with most roller skate models

Specification:

- Material: PVC
- Size: 17.2*5.5 cm
- Thickness: 1.2 mm

Laces

Glitter Lace

Features:

- Embedded glitter flecks for a dazzling, light-catching effect
- Available in six vibrant color options to suit your personal style
- Constructed with durable materials for long-lasting use
- Easy to lace and adjust for a secure fit

Specification:

- Length: 78.74 inches / 200cm
- Width: 8mm
- Material: Polyester

Article number:000000000

Protections

ROUND HELMET

Specification:

- Size: S/M/L
- Outer Material: ABS
- Inner Material: EPS
- Weight: 600g
- Adjustable: Yes

Article number:000000000

Protections

WS PROTECTION

Specification:

- Size: S/ M/ L
- Material: Polyester and PP
- Weight: 504g
- Packing: 1 pair of knee pads
1 pair of elbow pads
1 pair of wrist pads

Article number: 0000000000

Bags & Leash

Basic Bag

Features:

- Mesh cloth construction for superior ventilation and keeping your gear dry and odor-free
- Adjustable dual shoulder straps for comfortable carrying
- Built-in sleeve for secure skate storage

Specification:

- Size: 9.5*10.5CM
- Material: Polyester and mesh cloth

Article number:000000000

Bags & Leash

Leash

Features:

- Hands-free carrying design for effortless transportation
- Adjustable length to fit different skate sizes
- Durable construction for long-lasting use
- Compact and lightweight for convenient storage when not in use

Specification:

- Size: 33.86*1.42"(86X3.6cm) 20.50*1.42"(52X3.6cm)
- Material: Webbing and elastic band

Article number:000000000

Features:

- Compatibility with various skate setups
- Ensuring durability for extended and reliable use
- Saving time and effort

Article number:000000000

Specification:

- Size: 29.5*8*13CM
- Material: 6061 Aluminum and Steel Construction
- Net weight: 1023 gram
- Fit for: 608 and 688 bearings and 58mm to 125mm diameters wheels

Specification:

- Size: 9.6*10.4CM
- Net Weight: 112g
- Material: Steel

Article number:000000000

Including:

- 0.32" (8mm) hex-socket for truck bolts
- 0.53" (13.5mm) hex-socket for axle nuts
- 0.59" (15mm) hex-socket for truck kingpin
- 0.21" (5.5mm) Allen key with Phillips head on the opposite end
